

## Features

### Handle Bio Scanner

Allows for the setting and storing of users fingerprints for quick release.

### Code Release

Digital keypad for unlocking via code entry.

### E-Keys

Create temporary e-keys for visitors that don't require permanent access (guests, cleaners).

### ID Fob Reader

ID cards (fobs) can be set up and distributed for quick access. Cards can be controlled remotely, allowing them to be quickly added or removed.

### Remote Unlocking

Using the **TTLock** app admins can unlock remotely via Bluetooth or over wifi with a **BARS Gateway** (an easy to configure unit that makes talking to your lock online a breeze).

### App Based Config

All configuration is run through **TTLock**, a smart phone based app enabling full lock and user control. When coupled with a **BARS Gateway** admins can set up most functions remotely. Allowing key card, and code administration from afar.

### Timed Access

Set time based access slots for key codes, cards, or e-keys allowing timed access for specific visitors.

### Secure

Compatible mortice escape sashcase, double locked externally with free exit internally. Fitted with a euro cylinder, available with masterkey override suite.

### User Control

Grant access to other admin users allowing them to control the lock and its access methods.
