CL5010 Mortice Latch

Outside lever turns freely without operating the latchbolt. When valid code is entered and blue light burns, the lever will retract the latchbolt. When the door closes the spring latch will automatically lock the door. The key will open the door for management functions. The key may be used to set the lock into Code Free mode so that anyone can open the door without using a code. Code Free mode can also be programmed at the keypad using the Master Code.

CL5010BB Back to Back (for internal use only)

CL5000 locks may be ordered with 2 keypad plates for installation on both sides of the door to provide coded access in both directions.
