- PVD, weather resistant, low maintenance finish
- Full size lever handles
- Outside lever has a slipping clutch to avoid damage to the mechanism if forced
- Easy code change as often as required
- Code Free option available
- Mortice lock and mortice latch functions

Codelock CL500 Range

This is a heavy duty range with full size lever handles, allowing use as the primary lock on most doors, particularly in high traffic situations

The functions available allow for various ways of managing entry by code, by key and by Code Free operation of the lever handle on the CL505, CL515 and CL525 models.

CL515 Mortice Latch

As CL510 with Code Free access option on keypad. In Code Free mode the outside lever will retract the latchbolt without using a code.

Available in two PVD finishes
Stainless Steel, Polished Brass
