

## ABUS Pfaffenhain "Y" Keyways

Security, Strength, Quality

Patented Key Stop in Key Tip

"Y" section has a unique curved key blade & keyway  
Protects against illegal key duplication

### "Y" Section

With Hardened Pins

Full European Patent

6 Locking Elements

### "Y" Features

- Fully patented key protection to 2020 stops unauthorised key duplication
- BSI EN1303 "Kitemark™" with anti bump, pre snap & extra hardened pins available on factory production KD & KA cylinders
- 14mm cylinder plug allows a larger lock mechanism than a normal 13mm cylinder plug
- 14mm cylinder plug means 13 key steps rather than a conventional 10 key steps, allowing millions of key differs
- Keys & cylinder pins are nickel silver which reduces wear & extends the locks' working life
- Hardened steel 1st & 3rd pairs of pins for effective drill resistance
- Virtually any size of Euro Profile cylinder
- Attractive polished brass & nickel plated finish - other finishes available to special order
- Pinning kits, MK charts, specialist assembly tools & "O" bitted stock
- Ongoing technical support from ABUS UK Service Centre

**"Y" Section available in a wide range of cylinders including Euro Profile, UK Oval & Rim, Scandinavian & many more....  
.....plus a comprehensive integrated range of padlocks**
