Codelock CL400 Range

This is a medium duty range with full size lever handles, allowing use as the primary lock on doors where a knob-operated lock would be unsuitable.

Throwing the deadbolt of the CL420/425 models will lock out the code users when appropriate. A safety feature ensures that the inside lever handle will retract the deadbolt so avoiding accidentally locking a person in the room.

The key can be used to retract the latchbolt and so may be issued for cleaning and security staff use.

Codelock CL400 can also be supplied as front and back plates only, for use with customer's own installed mortice locks, making it an ideal economic solution for high traffic door control in health, educational and other institutional premises.

Available in two PVD finishes
Stainless Steel, Polished Brass
